Lobster Quality Workshop Series

The AVC Lobster Science Centre is proud to present the 'Lobster Quality Workshop Series.' The workshops are designed specifically for lobster fishers and include information sessions on: the biology of lobsters, a summary of lobster quality data collected around Southwest Nova Scotia (SWNS), and the quality of fresh vs. held lobster. These workshops are completely free and will be taking place throughout the SWNS area. We look forward to seeing you there!

To better accommodate those attending (size of room and coffee breaks) please call our toll free number to register:
